

WHY CHOOSE ISOTECH UV LINESETS

HMAX
QUALITY HVAC ACCESSORIES

1. Prevent Costly Calls with The BEST Coated Copper Pipe

Superior, anti-corrosive coated, 99.90% min. copper tubing that's free from leak and kink-causing imperfections as well as formicary corrosion. Stay protected with the ONLY coated copper tube in the industry while saving time and money with less service calls

2. Flexible Insulation Easily Fits Any Application

Flexible foam insulation bends easily to fit any installation

3. UV & Tear Resistant Tuff Jacket

Tough, tear-free quality that is resistant to sunlight and equipment maintenance

4. Quick and Easy Install with Less Service Calls

No field-applied coating or jacketing needed

Products are made to meet requirements of ASTM B1003

Whether it's for mini-split, residential unitary, heat pump or light commercial installations, choose the lineset that offers premium quality and performance - available in 1/2" thickness with 3 coil lengths – 50', 82', 164'.

ISOTECH UV Lineset	Features	
✓		Sunlight UV, tear, fire and water (UL94) resistant sheath ⁽¹⁾
✓		Superior certified R-Values to meet city codes and regulations
✓		Certified 99.9% pure ASTM B280 copper
✓		Formicary corrosion resistant (moisture, oxygen and VOCs)
✓		Protective polymer coated copper
✓		Quick and easy install - No field-applied coating or jacketing

(1) External UV-resistance tested according to ASTM standard to evaluate the impact of UV exposure on its mechanical properties, showing no degradation. Tested in accordance of UL94, to be top rated for Surface Burning Characteristics. Rated for plenum applications.

TECHNICAL SPECIFICATIONS

- **Superior insulation** - Flexible low-density, closed-cell polyethylene insulation with low thermal conductivity and a high resistance to moisture vapor intrusion
- **Durable, multi-layer protection** - Tear, equipment maintenance and UV resistant jacket combined with THE ONLY polymer protective coating applied to the 99.90+ % pure copper tubing
- **Code compliance** - Meets outdoor exposure requirements outlined by the IECC and ASHRAE code
- **Corrosion and fire resistant** - Resistant to fire and formicary corrosion including moisture, oxygen and harmful VOCs
- **Quick and easy install** - Coating comes standard, so no field-applied coating or jacketing required

ABOVE: The insulation and outer jacket of the Isotech UV product has been tested under the ASTM G154. Specimens were exposed as per ASTM G154 Cycle 1 - Standard Practice for performing accelerated outdoor weathering of nonmetallic materials using concentrated natural sunlight (Ultraviolet Lamp Apparatus) - showing no signs of degradation on the external sheath.
